

Appl. No. : 10/882,001
Filed : June 29, 2004

CLAIM AMENDMENTS:

WE CLAIM:

1. (Currently Amended) A cleaning implement comprising:
 - a. a handle; and
 - b. ~~a~~ a removable cleaning pad comprising:
 - i. 25 to 84% of a substrate selected from a group consisting of water-insoluble substrates, water-soluble substrates, and water-dispersible substrates, and combinations thereof; and
 - ii. 16 to 75% of a cleaning composition impregnated in said substrate; wherein said cleaning composition comprises:
 1. 0 to 60% of an anionic surfactant;
 2. 0 to 60% of a nonionic surfactant; and
 3. 1 to 2 to 60% of a carboxylic acid selected from a group consisting of sulfamic acid, glycolic acid, lactic acid, citric acid, and combinations thereof; ~~wherein said composition contains less than about 85% water~~
 4. 1% or more fragrance; and
 5. less than 85% water and greater than 20% water.
2. (Cancelled) The cleaning implement of claim 1, wherein said cleaning composition comprises greater than about 2% of said carboxylic acid.
3. (Original) The cleaning implement of claim 1, wherein said cleaning composition comprises less than about 2% organic solvent.

Appl. No. : 10/882,001
Filed : June 29, 2004

4. (Original) The cleaning implement of claim 1, wherein said cleaning composition comprises less than about 2% organic solvent having a boiling point less than 100⁰ C at 1 atm pressure.
5. (Cancelled) The cleaning implement of claim 1, wherein said cleaning composition comprises greater than about 0.5% fragrance or essential oil.
6. (Original) The cleaning implement of claim 1, wherein said cleaning pad is substantially dry-to-the-touch.
7. (Original) The cleaning implement of claim 1, wherein said cleaning composition comprises a dye that is visible in said cleaning pad when said cleaning pad is unused and said dye substantially decreases in visibility during use.
8. (Original) The cleaning implement of claim 2, wherein said cleaning composition has a pH of about 4 or lower.
9. (Original) The cleaning implement of claim 2, wherein said cleaning composition has antimicrobial efficacy selected from a group consisting of sanitizing, disinfecting and a combination thereof.
10. (Original) The cleaning implement of claim 2, wherein said cleaning composition has effervescent activity when combined with water.
11. (Original) The cleaning implement of claim 2, wherein said cleaning composition comprises bleaching actives.
12. (Original) The cleaning implement of claim 2, wherein said substrate is water-insoluble.
13. (Original) The cleaning implement of claim 2, wherein said substrate is water-dispersible.
14. (Original) The cleaning implement of claim 2, wherein said substrate comprises 2 or more layers.

Appl. No. : 10/882,001
Filed : June 29, 2004

15. (Original) The cleaning implement of claim 2, wherein said substrate comprises 3 or more layers.
16. (Original) The cleaning implement of claim 2, wherein said cleaning composition comprises greater than about 1% of said anionic surfactant.
17. (Original) The cleaning implement of claim 16, wherein said anionic surfactant comprises alkyl sulfate.
18. (Original) The cleaning implement of claim 16, wherein said cleaning composition comprises greater than 1% of said nonionic surfactant.
19. (Original) The cleaning implement of claim 18, wherein said nonionic surfactant comprises alkyl polyglycoside.
20. (Original) The cleaning implement of claim 16, wherein said cleaning composition comprises greater than about 5% of said nonionic surfactant.
21. (Original) The cleaning implement of claim 16, wherein said cleaning composition comprises greater than about 10% of said nonionic surfactant.
22. (Original) The cleaning implement of claim 16, wherein said cleaning composition comprises less than about 2% organic solvent.
23. (Original) The cleaning implement of claim 16, wherein said cleaning composition comprises less than about 2% organic solvent having a boiling point less than 100⁰ C at 1 atm pressure.
24. (Cancelled) The cleaning implement of claim 16, wherein said cleaning composition comprises greater than about 0.5% fragrance or essential oil.
25. (Original) The cleaning implement of claim 16, wherein said cleaning composition is dry-to-the-touch.

Appl. No. : 10/882,001
Filed : June 29, 2004

26. (Original) The cleaning implement of claim 16, wherein said cleaning composition has antimicrobial efficacy selected from a group consisting of sanitizing, disinfecting and a combination thereof.
27. (Original) The cleaning implement of claim 16, wherein said cleaning composition has effervescent activity when combined with water.
28. (Original) The cleaning implement of claim 16, wherein said cleaning composition comprises bleaching actives.
29. (Original) The cleaning implement of claim 16, wherein said cleaning composition comprises a dye that is visible in said cleaning pad when said cleaning pad is unused and said dye substantially decreases in visibility during use.
30. (Original) The cleaning implement of claim 2, wherein said cleaning composition comprises greater than about 2% of said anionic surfactant.
31. (Original) The cleaning implement of claim 30, wherein said cleaning composition comprises greater than about 1% of said nonionic surfactant.
32. (Original) The cleaning implement of claim 30, wherein said cleaning composition comprises greater than about 5% of said nonionic surfactant.
33. (Original) The cleaning implement of claim 30, wherein said cleaning composition comprises greater than about 10% of said nonionic surfactant.
34. (Original) The cleaning implement of claim 2, wherein said cleaning composition comprises greater than about 5% of said anionic surfactant.
35. (Original) The cleaning implement of claim 34, wherein said cleaning composition comprises greater than about 1% of said nonionic surfactant.
36. (Original) The cleaning implement of claim 34, wherein said cleaning composition comprises greater than about 5% of said nonionic surfactant.

Appl. No. : 10/882,001
Filed : June 29, 2004

37. (Original) The cleaning implement of claim 34, wherein said cleaning composition comprises greater than about 10% of said nonionic surfactant.
38. (Original) The cleaning implement of claim 1, wherein said cleaning composition comprises greater than 5% of said carboxylic acid.
39. (Original) The cleaning implement of claim 38, wherein said cleaning composition comprises greater than 1% of said anionic surfactant.
40. (Original) The cleaning implement of claim 39, wherein said cleaning composition comprises greater than 1% of said nonionic surfactant.
41. (Original) The cleaning implement of claim 39, wherein said cleaning composition comprises greater than 5% of said nonionic surfactant.
42. (Original) The cleaning implement of claim 39, wherein said cleaning composition comprises greater than 10% of said nonionic surfactant.
43. (Original) The cleaning implement of claim 38, wherein said cleaning composition comprises greater than 2% of said anionic surfactant.
44. (Original) The cleaning implement of claim 43, wherein said cleaning composition comprises greater than 1% of said nonionic surfactant.
45. (Original) The cleaning implement of claim 43, wherein said cleaning composition comprises greater than 5% of said nonionic surfactant.
46. (Original) The cleaning implement of claim 43, wherein said cleaning composition comprises greater than 10% of said nonionic surfactant.
- 47-64. (Cancelled)
65. (New) A cleaning pad comprising:

Appl. No. : 10/882,001
Filed : June 29, 2004

- a. 25 to 84% of a substrate selected from a group consisting of water-insoluble substrates, water-soluble substrates, and water-dispersible substrates, and combinations thereof; and
- b. 16 to 75% of a cleaning composition impregnated in said substrate; wherein said cleaning composition comprises:
 - i. 0 to 60% of an anionic surfactant;
 - ii. 0 to 60% of a nonionic surfactant; and
 - iii. 2 to 60% of a carboxylic acid selected from a group consisting of sulfamic acid, glycolic acid, lactic acid, citric acid, and combinations thereof;
 - iv. 1% or more fragrance; and
 - v. less than 85% water and greater than 20% water.

66. (New) A cleaning pad comprising:

- a. 25 to 84% of a substrate selected from a group consisting of water-insoluble substrates, water-soluble substrates, and water-dispersible substrates, and combinations thereof; and
- b. 16 to 75% of a cleaning composition impregnated in said substrate; wherein said cleaning composition comprises:
 - i. 1 to 60% of an anionic surfactant;
 - ii. 1 to 60% of a nonionic surfactant; and
 - iii. 1 to 60% of a carboxylic acid selected from a group consisting of sulfamic acid, glycolic acid, lactic acid, citric acid, and combinations thereof;
 - iv. 1% or more fragrance; and

Appl. No. : 10/882,001
Filed : June 29, 2004

v. less than 85% water and greater than 20% water.
